

**Total Questions: 35**

**LEVEL – II**

**Time: 1.5 hr.**  
**Total Marks: 70**

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SECTION - 1 | <ul style="list-style-type: none"> <li>This section contains <b>FIFTEEN (15)</b> questions. Each question has <b>FOUR</b> options. <b>ONLY ONE</b> of these four options is the correct answer.</li> <li>For each correct answer you will get <b>TWO</b> marks. There are <b>NO NEGATIVE</b> marks for wrong answers</li> </ul>                                                                                                                        |
| SECTION - 2 | <ul style="list-style-type: none"> <li>This section contains <b>EIGHT (08)</b> questions. Each question has <b>FOUR</b> options. <b>ONE OR MORE THAN ONE</b> of these four option(s) is(are) correct answer(s).</li> <li>For each correct answer you will get <b>TWO</b> marks, if all the options are correct. If the correct answers chosen are less than the actual correct answers, partial marking (basis on weightage) will be given.</li> </ul> |
| SECTION - 3 | <ul style="list-style-type: none"> <li>This section contains <b>NINE (09)</b> questions of <b>PASSAGE TYPE OR COMPREHENSION TYPE</b>.</li> <li>Under each paragraph there will be three questions that has <b>FOUR</b> options. <b>ONLY ONE</b> of these four options is the correct answer.</li> </ul>                                                                                                                                                |
| SECTION - 4 | <ul style="list-style-type: none"> <li>This section contains <b>THREE (03)</b> questions. These questions are <b>MATCHING TYPE BASED QUESTIONS</b>.</li> <li>For each correct answer you will get <b>TWO</b> marks. There are <b>NO NEGATIVE</b> marks for wrong answers</li> </ul>                                                                                                                                                                    |

### Section - 1

- Arrange: 506, 650, 560, 605 in ascending order.
  - 506, 560, 605, 650
  - 506, 605, 560, 650
  - 560, 506, 605, 650
  - 650, 605, 560, 506
- Two roads cross each other at a traffic signal. What type of lines are they?
  - Parallel lines
  - Curved lines
  - Intersecting lines
  - Perpendicular bisectors
- A farmer has a rectangular field of length 48 m and breadth 32 m. He wants to put 3 rounds of fencing around it. What is the total length of wire required?

- (A) 160 m (B) 240 m  
(C) 480 m (D) 960 m

4. A teacher says that multiplying numerator and denominator by the same number does not change the value. Which of the following is equivalent to  $\frac{5}{6}$ ?

- (A)  $\frac{10}{18}$  (B)  $\frac{15}{18}$   
(C)  $\frac{20}{30}$  (D)  $\frac{25}{24}$

5. Evaluate:  $20 - 4 \times 3 + 18 \div 6$

- (A) 10 (B) 11  
(C) 14 (D) 16

6. A school prints ID numbers like 45872, 73645, 98210, 65124. Which ID number is divisible by both 2 and 5?

- (A) 45872 (B) 73645  
(C) 98210 (D) 65124

7. A shopkeeper adds ₹250 and ₹375. Which property ensures the result is still a whole number?

- (A) Commutative  
(B) Closure under addition  
(C) Associative  
(D) Identity

8. The pie chart shows the distribution of food preferences in a restaurant. If the restaurant serves 1000 meals in a day, how many of them are Vegetarian meals?

- (A) 200 (B) 250  
(C) 300 (D) 350

9. A student draws a line segment joining two points on a circle but it does not pass through the centre. What is this segment called?

- (A) Radius (B) Diameter  
(C) Chord (D) Arc

10. A customer buys items worth ₹ 24.06 and ₹ 8.2. What is the total bill?

- (A) ₹ 32.26 (B) ₹ 32.6  
(C) ₹ 32.20 (D) ₹ 31.26

11. A butterfly sits on a leaf. Which line divides it into two equal halves?

- (A) Horizontal line (B) Vertical line  
(C) Slanting line (D) No line

12. A clock shows 12:20 PM. What type of angle is formed between the hour and minute hands?

- (A) Acute angle (B) Right angle  
(C) Obtuse angle (D) Straight angle

13. A triangular park is in the shape of an equilateral triangle with each side 35 m. A walking track is made around it. What is the total distance covered in one round?

- (A) 70 m (B) 105 m  
(C) 140 m (D) 175 m

14. The pictograph shows the number of students who like different sports. Each symbol represents 5 students. How many students like Cricket?

| Sports    | No. of Students  = 5 Students |
|-----------|------------------------------------------------------------------------------------------------------------------|
| Swim      |                               |
| Badminton |                               |
| Football  |                               |
| Cricket   |                               |
| Tennis    |                               |

- (A) 20 (B) 25  
(C) 30 (D) 35

15. Two bells ring at intervals of 6 minutes and 8 minutes. After how many minutes will they ring together again?

- (A) 12 (B) 24  
(C) 48 (D) 14

## Section - 2

16. Which numbers are correctly in descending order?

- (A) 9000, 8000, 7000, 6000  
(B) 456, 465, 546, 564  
(C) 100, 99, 98, 97  
(D) 8765, 7654, 6543, 5432

17. A cook divides a cake into 6 equal pieces. Later, the same cake is cut into 12 equal pieces. Which of the following represent the same quantity as 3 pieces out of 6?

- (A)  $\frac{6}{12}$  (B)  $\frac{4}{8}$   
(C)  $\frac{9}{18}$  (D)  $\frac{3}{12}$

18. A shopkeeper calculates total items using different operations: Which operations will ALWAYS give a whole number?

- (A)  $45 + 67$  (B)  $45 \times 67$   
(C)  $45 \div 67$  (D)  $45 - 67$

19. Which of the following represent the same value?

- (A) 5.2 and 5.20 (B) 3.40 and 3.4  
(C) 7.005 and 7.05 (D) 8.000 and 8

20. Which numbers are divisible by 2, 3, and 5?

- (A) 30 (B) 60  
(C) 90 (D) 75

21. A rope of length 120 m is used to fence shapes. Which shapes can be formed using the entire rope?

- (A) Square of side 30 m  
(B) Rectangle of length 40 m and breadth 20 m  
(C) Equilateral triangle of side 40 m  
(D) Regular hexagon of side 20 m

22. A designer is creating tiles using different shapes. Which of the following shapes will have more than one line of symmetry?

23. A torch emits light starting from a point and going in one direction. Which statements are correct?

- (A) It represents a ray  
(B) It has a fixed length  
(C) It extends endlessly in one direction  
(D) It has two endpoints

### Section - 3

#### Passage 1:

A school has a total budget of ₹9321.654.  
The expenses are:

- Decoration: ₹1200.5
- Materials: ₹2450.75
- Prizes: ₹3100.404

The remaining amount is saved.

24. What is the place value of digit 5 in ₹9321.654?

- (A) 5 (B) 5/10  
(C) 5/100 (D) 5/1000

25. Which is the correct expanded form of ₹9321.654?

- (A)  $9000 + 300 + 20 + 1 + 6/10 + 5/100 + 4/1000$   
(B)  $9000 + 300 + 21 + 6/10 + 5/100 + 4/100$   
(C)  $9000 + 300 + 20 + 1 + 6/100 + 5/10 + 4/1000$   
(D)  $9000 + 320 + 1 + 6/10 + 5/100 + 4/1000$

26. What is the total expense?

- (A) ₹6751.654 (B) ₹6751.68  
(C) ₹6752.654 (D) ₹6749.654

#### PASSAGE-2

An equilateral triangle has each side 18 m.  
A wire is used to cover its boundary. Later, each side is reduced by 3 m.

27. Perimeter of triangle is:

- (A) 36 m (B) 54 m  
(C) 60 m (D) 48 m

28. Cost of fencing at ₹5 per metre is:

- (A) ₹250 (B) ₹270  
(C) ₹300 (D) ₹280

29. New perimeter is:

- (A) 45 m (B) 48 m  
(C) 42 m (D) 50 m

#### PASSAGE-3

A school has 48 boys and 72 girls participating in sports. The teacher wants to form maximum equal groups such that each group has the same number of boys and girls.

30. What is the maximum number of groups that can be formed?

- (A) 6 (B) 8  
(C) 12 (D) 24

31. Number of boys in each group = ?

- (A) 2 (B) 3  
(C) 4 (D) 6

32. Prime factorisation of 72 is:

- (A)  $2^2 \times 3^2$  (B)  $2^3 \times 3^2$   
(C)  $2^3 \times 3^3$  (D)  $2^4 \times 3$

### Section - 4

33.

| Column I (Situation)                                                  | Column II (Total Length / Quantity) |
|-----------------------------------------------------------------------|-------------------------------------|
| (a) A carpenter joins $2\frac{3}{4}$ m wood and $1\frac{1}{2}$ m wood | (i) 8m                              |
| (b) A tank is filled by $3\frac{2}{5}$ L and $2\frac{3}{10}$ L water  | (ii) $4\frac{1}{4}$ m               |
| (c) A ribbon of $4\frac{1}{6}$ m and $3\frac{5}{6}$ m is combined     | (iii) $5\frac{7}{10}$ L             |
| (d) A rope of $5\frac{1}{3}$ m and $3\frac{2}{3}$ m is tied           | (iv) 9m                             |

- (A) a-i, b-ii, c-iv, d-iii  
(B) a-iii, b-i, c-iv, d-ii  
(C) a-ii, b-iii, c-i, d-iv  
(D) a-ii, b-iii, c-iv, d-i

34.

| Column I                  | Column II  |
|---------------------------|------------|
| (a) $-245 + 890 + (-765)$ | (i) -130   |
| (b) $-3450 + (-4550)$     | (ii) -120  |
| (c) $6789 + (-6789)$      | (iii) 0    |
| (d) $-980 + 850$          | (iv) -8000 |

- (A) a-ii, b-iv, c-iii, d-i  
(B) a-ii, b-iii, c-iv, d-i  
(C) a-i, b-iv, c-iii, d-ii  
(D) a-ii, b-i, c-iv, d-iii

35. Match each situation with the correct side length.

| Column I (Perimeter)                          | Column II (Side Length) |
|-----------------------------------------------|-------------------------|
| (a) Square with perimeter 72 cm               | (i) 27 cm               |
| (b) Equilateral triangle with perimeter 81 cm | (ii) 18 cm              |
| (c) Regular pentagon with perimeter 95 cm     | (iii) 19 cm             |
| (d) Regular hexagon with perimeter 84 cm      | (iv) 14 cm              |

- (A) a-iv, b-i, c-ii, d-iii  
(B) a-ii, b-iii, c-i, d-iv  
(C) a-i, b-ii, c-iii, d-iv  
(D) a-ii, b-i, c-iii, d-iv
