

Total Questions: 30

LEVEL – II

Time: 1.5 hr.
Total Marks: 70

SECTION - 1

- This section contains **TWELVE (12)** questions. Each question has **FOUR** options. **ONLY ONE** of these four options is the correct answer.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers.

SECTION - 2

- This section contains **SIX (06)** questions. Each question has **FOUR** options. **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each correct answer you will get **TWO** marks, if all the options are correct. If the correct answers chosen are less than the actual correct answers, partial marking (basis on weightage) will be given.
- There are **NO NEGATIVE** marks for wrong answers.

SECTION - 3

- This section contains **NINE (09)** questions of **PASSAGE TYPE OR COMPREHENSION TYPE**.
- Under each paragraph there will be three questions that has **FOUR** options. **ONLY ONE** of these four options is the correct answer.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers.

SECTION - 4

- This section contains **THREE (03)** questions. These questions are **MATCHING TYPE BASED QUESTIONS**.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers

Section - 1

1. Which transport is **MOST** suitable for delivering urgent medical supplies to a remote island?

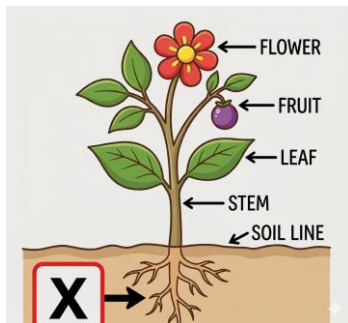

2. What is happening in the picture when Ravi throws garbage into the pond?

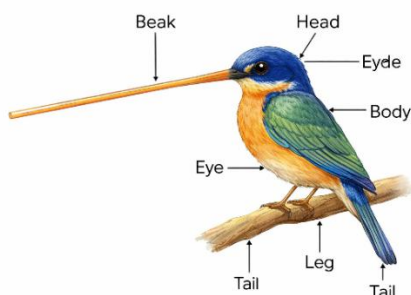

- A) Air pollution B) Soil erosion
C) Water pollution D) Noise pollution

3. What is the part labeled 'X' from a healthy potted plant?

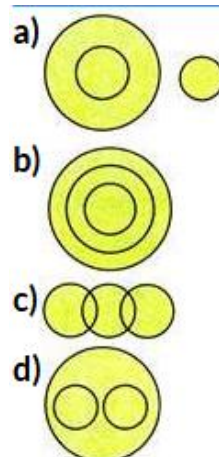

- A) Roots. B) Soil.
C) Leaves. D) Stem.
4. A student observes that the Sun rises exactly from the east every day. Which statement is MOST correct?
- A) Sun actually moves around Earth daily
B) Earth rotates from west to east
C) Earth rotates from east to west
D) Sun rotates faster than Earth
5. Ramya observes an object and notes the following properties:
- It has a fixed shape and fixed size
 - It does not flow
- Which of the following objects matches these observations?
- A) Water B) Air
C) Book D) Milk
6. Which bird is this most likely to be?

- A) An Eagle that hunts small rabbits.
B) A Woodpecker that drills into trees.

- C) A Sunbird or Hummingbird that drinks nectar from flowers.
D) A Parrot that cracks hard nuts.

7. Which of the following diagrams indicates the best relation amongst firefly, Lamp and Light?

8. What process causes the formation of water droplets on the outer surface of the cold glass shown in the image?

- A) Evaporation B) Condensation
C) Sublimation D) Freezing
9. Which of these houses is "mobile" or can be moved from one place to another easily?

- A) A bungalow made of bricks and cement.
B) An igloo made of blocks of ice.
C) A caravan (house on wheels) or a tent.
D) A stilt house built on high wooden poles.

10. A child observes two sounds:

- One is very loud
- One is very soft

What is the main difference?

- A) Colour of object B) Size of object
C) Strength of vibration D) Shape of object

11. Rohan is eating a slice of lemon. He makes a funny face because it tastes very sour. Which part of his body told his brain that the lemon was sour?

- A) The small bumps on his tongue called taste buds.
B) The tip of his nose by smelling the lemon juice.
C) The skin on his lips by feeling the wetness.
D) His teeth by biting into the yellow skin.

12. Which of the following is not a use of water?

- A)  B) 
C)  D) 

Section - 2

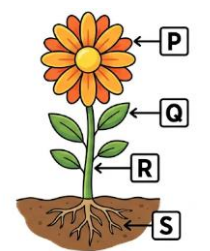

13. Which conditions are necessary for successful communication?

- A) Message is understood correctly
B) Message is sent fast
C) Sender and receiver share understanding
D) Medium is always digital

14. Which of the following diagrams show that air occupies space?

- A)  B) 
C)  D) 

15. Look at the diagram of a flower. Which of the following parts are correctly identified?

- A) P is the brightly colored petal that attracts bees.
B) Q is the leaf where the plant prepares its food.
C) R is the stem that carries water to the flower.
D) S is the fruit that contains the seeds.

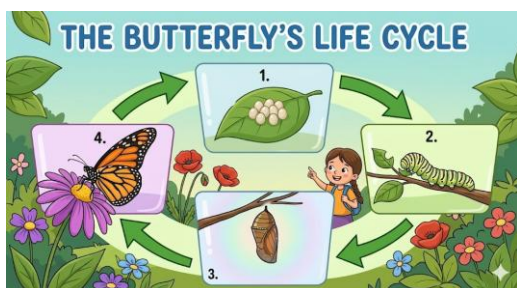

16. Which statements explain why stars appear to move?

- A) Earth rotates
B) Stars actually travel around Earth
C) Apparent motion due to Earth's movement
D) Sun pushes stars

17. Which of the following are sources of water?

18. Look at the diagram of a Butterfly's life cycle. Which of the following stages are correctly described?

- A) Stage 2 is the most active feeding stage where it eats leaves.
- B) Stage 3 is the resting stage where the body changes completely.
- C) Stage 4 is the only stage where the insect can fly.
- D) Stage 1 always takes place underwater in ponds.

Section - 3

COMPREHENSION-1

Inside our body, many "secret workers" are busy all day. When you take a deep breath, your Lungs expand like balloons to take in fresh air. This air has oxygen, which your Heart then pumps through your blood to every part of your body.

While you are playing, your Stomach is like a mixer, turning the food you ate into a soft soup so your body can get energy. All these workers follow the orders of the Brain,

which sits inside your hard skull. The brain tells your legs to run, your eyes to see, and even your heart to beat!

19. If the "Heart" is a pump, what are the "tubes" that carry the blood it pumps throughout the body?

- A) The Windpipe B) Blood Vessels
- C) The Food Pipe D) Muscles

20. Which organ expands like a balloon when we breathe?

- A) Heart B) Brain
- C) Lungs D) Stomach

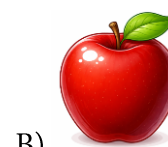

21. The Brain sits inside a "hard skull." Why is this hard bone necessary for the brain?

- A) To help the brain think much faster and harder.
- B) To act as a helmet and protect the soft brain from getting hurt.
- C) To store the food that the brain needs to eat.
- D) To make the head heavy so we can balance while walking.

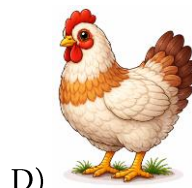

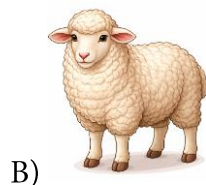

COMPREHENSION-2

Natural materials come from nature such as plants, animals, or the Earth, and are not made by humans.

22. Which of the following is a natural material?

23. From which of the following are natural materials not obtained?

24. Which of the following is a man-made material?

COMPREHENSION-3

A child observes that one object in the sky is visible only during the day and is very bright. Another group of objects is visible only at night and appears to twinkle. A third object is sometimes visible both during the day and at night but does not produce its own light. The child also notices that some objects around him can be seen only when light falls on them.

25. Which object is visible only during the day?

- A) Moon B) Stars
C) Sun D) Planets

26. Which group of objects produces its own light?

- A) Moon B) Stars
C) Planets D) Objects around us

27. Which conclusion is correct?

- A) All visible objects produce light
B) Some objects reflect light
C) Stars reflect sunlight
D) Moon produces light

Section - 4

28. Match Column A with Column B

Column A (Action)	Column B (What happens)
A. Ringing a bell	P. Object moves faster
B. Pushing a toy car harder	Q. Sound is produced
C. Holding a vibrating object	R. Sound stops
D. Ball rolling on ground	S. It slows down and stops

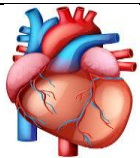

- A) A-R, B-S, C-Q, D-P
B) A-S, B-R, C-Q, D-P
C) A-R, B-Q, C-S, D-P
D) A-Q, B-P, C-R, D-S

29. Match Column A with Column B

Column A -Unit	Column B - Measuring Instrument
(A) Centimetre	(P) 
(B) Gram	(Q) 
(C) Millilitre	(S) 
(D) Second	(R) 

- A) A – P, B – Q, C – R, D – S
 B) A – Q, B – P, C – R, D – S
 C) A – R, B – S, C – P, D – Q
 D) A – R, B – S, C – Q, D – P

30. Match Column I with Column II

Column I (Organ)	Column II (Main Job)
(A) 	(P) Mixing food with digestive juices
(B) 	(Q) Sending and receiving messages
(C) 	(R) Pumping blood to all body parts
(D) 	(S) Taking in oxygen and giving out carbon dioxide

- A) A-R, B-S, C-P, D-Q
 B) A-S, B-R, C-Q, D-P
 C) A-R, B-P, C-S, D-Q
 D) A-P, B-S, C-R, D-Q
