

Total Questions: 30

LEVEL – II

Time: 1.5 hr.

Total Marks: 70

SECTION - 1

- This section contains **TWELVE (12)** questions. Each question has **FOUR** options. **ONLY ONE** of these four options is the correct answer.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers.

SECTION - 2

- This section contains **SIX (06)** questions. Each question has **FOUR** options. **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each correct answer you will get **TWO** marks, if all the options are correct. If the correct answers chosen are less than the actual correct answers, partial marking (basis on weightage) will be given.
- There are **NO NEGATIVE** marks for wrong answers.

SECTION - 3

- This section contains **NINE (09)** questions of **PASSAGE TYPE OR COMPREHENSION TYPE**.
- Under each paragraph there will be three questions that has **FOUR** options. **ONLY ONE** of these four options is the correct answer.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers.

SECTION - 4

- This section contains **THREE (03)** questions. These questions are **MATCHING TYPE BASED QUESTIONS**.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers

Section - 1

1. Which of the following statements is incorrect?

- (A) All stars are part of the Solar System
- (B) The Sun is a star
- (C) Planets do not produce their own light
- (D) The Moon revolves around Earth

2. When an ice cube melts into water, what is happening to the particles?

A) They lose energy and stop moving.

B) They gain heat energy and start moving faster.

C) They turn into gas immediately.

D) They become more rigid and hard.

3. Even though sunlight is shown falling on the leaf, what additional substance is needed for food making?

- (A) Oxygen (B) Carbon dioxide
(C) Nitrogen (D) Hydrogen

4. If the Earth had no tilt, what would happen?

- (A) No day and night (B) No seasons
(C) No gravity (D) No atmosphere

5. When you take a hot shower, you often see tiny water droplets forming on the cold bathroom mirror. What is the correct sequence of states of matter for this process?

- A) Gas → Liquid B) Solid → Liquid
C) Liquid → Gas D) Liquid → Solid

6. This animal can survive many days without water because:

- A) It consumes sand to absorb moisture
B) It stores fat in its hump for water and energy
C) It gets water only from the leaves it eats
D) It sleeps during the hottest part of the day to conserve water

7. Which option represents a scientifically correct and safe choice of clothing?

- A) Wearing wool in summer to absorb sweat
B) Wearing raincoat on a sunny day to protect from UV rays
C) Wearing cotton clothes in summer while playing outdoors
D) Wearing light clothes in snow to move freely

8. Study the flow chart below. What should be in the box labeled 'X'?

Ground Level → Troposphere → Stratosphere
→ [X] → Thermosphere

- A) Exosphere B) Mesosphere
C) Ozone Layer D) Space

9. A child eats only the food shown daily. Which problem is most likely over time?

- A) Lack of energy B) Weak muscles
C) Improved immunity D) Faster growth

10. Which situation shows only gravitational force acting?

- A) A magnet attracting pins
B) A car stopping due to brakes
C) A person lifting a bag
D) A ball falling from a height

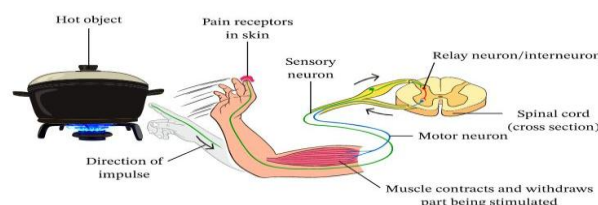

11. Two cities, City A and City B, have the same temperature (30°C).

- In City A, wet clothes dry in 30 minutes.
- In City B, wet clothes take 3 hours to dry and people feel very sticky.

Which statement is TRUE?

- A) City A has higher humidity than City B.
B) City B has higher humidity than City A.
C) City B has more sunlight than City A.
D) Humidity does not affect how clothes dry.

12. The hand is pulled back quickly after touching a hot object.

What is the main reason for this quick action?

- A) Muscles act without any control
B) Brain and nerves send rapid signals
C) Blood reacts immediately to heat
D) Skin alone controls the movement

Section - 2

13. Which statement best distinguishes a star from a planet?

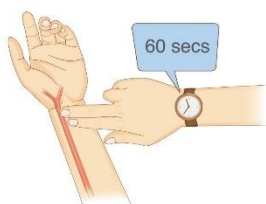

- A) Stars are larger than planets
- B) Stars emit their own light due to nuclear fusion
- C) Planets revolve around stars
- D) All planets have moons

14. A group of students noticed that the marble walls of a historical monument are turning yellow and the trees nearby have dark, shrivelled leaves. Which of the following statements explain these observations?

- A) Pollutants in the air are reacting with the stone surface of the monument.
- B) Dust and soot are settling on the leaves, preventing them from getting enough sunlight.
- C) The trees are releasing too much oxygen, which is staining the building.
- D) Toxic gases in the atmosphere are damaging the health of both the nature and the building.

15. The child is checking pulse at the wrist.

Which statements are true about this activity?

- (A) Measures heart beats per minute
- (B) Shows how fast blood circulates
- (C) Indicates blood flow and pulse strength
- (D) Shows body temperature

16. Which are examples of *simple machines*?

- A) Knife
- B) Ramp
- C) Bicycle wheel
- D) Electric fan

17. A scientist wants to create a solution by mixing a solid powder into a liquid until the powder disappears. Why is water a good choice for this experiment?

- A) Because it flows from high to low places.
- B) Because it can change its state.
- C) Because it is a universal solvent.
- D) Because it is tasteless.

18. The child is eating a carrot. Which are true effects of this food?

- A) Improves vision
- B) Strengthens teeth
- C) Provides vitamins
- D) Increases body fat only

Section - 3

COMPREHENSION-1

Ravi visited a pond near his village. He noticed a plant floating on the water with long, thin leaves. Its roots were hanging freely in the water. Ravi observed that small insects sometimes got trapped on its leaves. He also saw a few terrestrial plants growing along the

edge of the pond. He remembered his teacher saying that some plants can live in water, some on land, and some can even trap insects.

19. The plant floating on water with roots hanging freely is an example of:

- A) Terrestrial plant B) Aquatic plant
- C) Carnivorous plant D) Fungi

20. Which process allows the plant's leaves to make food?

- A) Photosynthesis B) Transpiration
- C) Digestion D) Respiration

21. The plant that traps insects is called:

- A) Sunflower B) Grass
- C) Venus flytrap D) Mango

COMPREHENSION-2

Sana decided to test three different soil samples from her neighborhood to see which one would be best for her sunflowers.

- **Sample X:** Water passes through it very quickly, and it feels gritty.
- **Sample Y:** It feels very sticky. When Sana watered it, the water stayed on top for a long time.
- **Sample Z:** It is a dark color, feels crumbly, and stayed moist but not muddy after watering.

22. Based on Sana's observations, which of the following correctly identifies the soil types?

- A) X-Clay, Y-Loam, Z-Sand
- B) X-Sand, Y-Clay, Z-Loam
- C) X-Loam, Y-Sand, Z-Clay
- D) X-Sand, Y-Loam, Z-Clay

23. In which sample will Sana's sunflowers likely grow the tallest and healthiest?

- A) Sample X, because the roots need a lot of air and no water.
- B) Sample Y, because the stickiness helps the plant stand straight.

C) Sample Z, because it contains a balanced mix of sand, clay, and organic matter.

D) None, as sunflowers can only grow in Rocky soil.

24. Sana realized she didn't have enough of Sample Z. She decided to "make" more by crushing rocks with a hammer for an hour. Why will this not work?

- A) Soil formation requires only sunlight, not rocks.
- B) Soil formation is a very slow process taking thousands of years to mix minerals with organic matter.
- C) Hammers make the soil too salty for plants.
- D) You cannot make soil from rocks; soil only comes from dead animals.

COMPREHENSION-3

While lifting a bucket using a pulley, a child notices that the effort feels less even though the same gravitational force acts on the bucket, due to a change in direction of applied force and distribution of work.

25. What is the primary reason the effort feels less while using the pulley?

- A) Gravitational force decreases
- B) Work done becomes zero
- C) Direction of force changes making lifting easier
- D) Mass of the bucket reduces

26. If the bucket does not move despite pulling the rope, what can be concluded?

- A) Energy is not used
- B) Work is done due to force
- C) No work is done due to lack of displacement
- D) Gravitational force is absent

27. Why does the pulley *not* reduce the total work done?

- A) Because it increases gravitational force
- B) Because distance moved by effort changes inversely
- C) Because energy is destroyed
- D) Because mass becomes zero

Section - 4

28. Match Column I with Column II

Column I (Material)	Column II (Property & Use)
A. Cotton	P. Waterproof, used in raincoats
B. Wool	Q. Soft, absorbs sweat, summer wear
C. Silk	R. Warm, used in winter clothes
D. Nylon	S. Smooth, shiny, used in traditional wear

- A) A-P, B-R, C-Q, D-S
- B) A-R, B-Q, C-P, D-S
- C) A-Q, B-S, C-R, D-P
- D) A-Q, B-R, C-S, D-P

29. Match Column A with Column B

Column A (Mixture Type)	Column B (Best Method)
A. Solid + Solid (Large size)	P. Handpicking
B. Solid + Liquid (Soluble)	Q. Evaporation
C. Solid + Liquid (Insoluble)	R. Filtration
D. Liquid + Liquid (Immiscible)	S. Separating Funnel

Which of the following options shows the correct matching?

- A) A – P, B – Q, C – R, D – S
- B) A – Q, B – P, C – R, D – S
- C) A – R, B – S, C – P, D – Q
- D) A – R, B – S, C – Q, D – P

30. Match Column I with Column II

Column A	Column B
A) Camel	P) Swamps, ponds, rivers
B) Tiger	Q) Deserts
C) Frog	R) Grasslands and forests
D) Fish	S) Water (ponds, rivers, oceans)

- A) A-Q, B-R, C-P, D-S
- B) A-R, B-Q, C-S, D-P
- C) A-S, B-P, C-R, D-Q
- D) A-Q, B-P, C-R, D-S
