

Total Questions: 30

LEVEL – II

Set - B

Time: 1.5 hr.

Total Marks: 60

SECTION - 1

- This section contains **FIFTEEN (15)** questions. Each question has **FOUR** options. **ONLY ONE** of these four options is the correct answer.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers.

SECTION - 2

- This section contains **EIGHT (08)** questions. Each question has **FOUR** options. **ONE OR MORE THAN ONE** of these four option(s) is(are) correct answer(s).
- For each correct answer you will get **TWO** marks, if all the options are correct. If the correct answers chosen are less than the actual correct answers, partial marking (basis on weightage) will be given.
- There are **NO NEGATIVE** marks for wrong answers.

SECTION - 3

- This section contains **NINE (09)** questions of **PASSAGE TYPE OR COMPREHENSION TYPE**.
- Under each paragraph there will be three questions that has **FOUR** options. **ONLY ONE** of these four options is the correct answer.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers.

SECTION - 4

- This section contains **THREE (03)** questions. These questions are **MATCHING TYPE BASED QUESTIONS**.
- For each correct answer you will get **TWO** marks. There are **NO NEGATIVE** marks for wrong answers

Section - 1

1. Which pairing is incorrectly matched?

- A) Silk – raincoat – waterproof
- B) Wool – winter wear – insulation
- C) Polyester – sportswear – quick drying
- D) Nylon – raincoat – water-resistant

2. Which of the following is TRUE about the "Invisible Dancers"?

- A) They have a definite surface that you can touch.
- B) They only fill the bottom of a container.
- C) They expand to fill all the available space in a room.

D) They cannot be compressed into small spaces.

3. The plant shown survives in very dry areas. Which feature mainly helps it survive there?

- A) Large broad leaves
- B) Thin delicate stem
- C) Soft weak roots
- D) Thick stem storing water

4. Which simple machine works by changing the direction of force?

- A) Wedge B) Pulley
C) Screw D) Inclined plane

5. Which of the following is an example of 'Deposition'?

A) Clouds producing rain.

B) Ice cream melting on a hot day.

C) A lake freezing over in winter.

D) Frost forming on a window pane during a freezing night.

6. The shape of the beak differs in birds. What is the main reason for this difference?

- A) To suit the type of food they eat
B) To make feeding and catching food easier
C) To match their feeding habits and diet
D) To help in making nests easily

7. Which action is scientifically incorrect first aid?

- A) Applying ice to sprain
B) Cooling burn under water
C) Tilting head backward during nosebleed
D) Covering cleaned wound with bandage

8. An Earth scientist is looking for a specific layer. Based on the table below, which layer is she studying?

Feature	Data
Temperature	Extremely Hot
Location	Above the Mesosphere
Activity	Auroras (Northern Lights) happen here

- A) Stratosphere B) Exosphere
C) Thermosphere D) Troposphere

9. The foods shown are eaten regularly by a child.

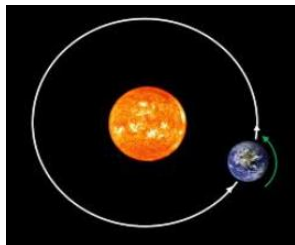

What is the most likely long-term effect?

- A) May cause weaker bones and lower immunity over time
B) May lead to obesity and other health issues
C) Could temporarily give energy but reduce overall health
D) Might affect concentration and digestion if eaten excessively

10. Which of the following involves energy but no work done?

- A) Lifting a book
B) Kicking a football
C) Sliding a box across the floor
D) Holding a heavy bag without moving

11. Look at the diagram of Earth orbiting the Sun. If the Earth stopped tilting and stood perfectly straight, what would happen?

- A) The Earth would have no more day and night.
 - B) The Earth not stop moving around the Sun.
 - C) There would be no change in seasons throughout the year.
 - D) The Sun would stop providing heat.
12. Blood flows out when the skin is cut.

Why does this happen?

- A) Blood is stored inside the skin
- B) Blood flows through vessels under the skin
- C) Skin produces blood continuously
- D) Air pressure pushes blood out

Section - 2

13. Study the phase sequence of the Moon:

which is correct?

- A) Phase X is a "Crescent" and occurs as the Moon orbits Earth.
- B) Phase Y is a "New Moon" because it is moving toward the Full Moon.
- C) Phase X is "Makar Sankranti" as it marks the Sun's movement.
- D) Phase Y is "Diwali" because it occurs during the brightest phase.

14. Which of these combinations of actions would be the most effective "Green Plan" for a family to reduce their carbon footprint and air pollution?

- A) Using a compost pit for food scraps instead of burning them with dry leaves.
- B) Switching off the air conditioner and fans when the family goes out for dinner.
- C) Cutting down old trees in the backyard to make room for a larger garage.
- D) Using the city metro or a bus instead of driving three separate cars.

15. The diagram shows a knee joint. Which are correct functions of the knee?

- A) Allows bending and straightening
- B) Supports body weight
- C) Produces blood
- D) Helps in walking

16. Which of the following depend directly on the Sun's energy?

- A) Photosynthesis in plants
- B) Earth's temperature
- C) Moon's phases
- D) Artificial satellites

17. Hydroelectric dams produce electricity by using the movement of water. Which property of water makes this possible?

- A) Water can dissolve sugar.
- B) Water changes into vapor when heated.
- C) Water has no taste.
- D) Water flows from higher places to lower places.

18. The diagram shows milk, cheese, and yogurt.

Which are correct health benefits?

- A) Strengthens bones and teeth
- B) Provides calcium
- C) Gives fiber
- D) Helps in growth and repair

Section - 3

COMPREHENSION-1

Riya visited a desert with her family. She saw many plants with thick, fleshy stems and small leaves. Some had thorns instead of leaves. She noticed that the soil was very dry, and it rained very rarely. Riya remembered her teacher saying that desert plants store water in their stems, reduce water loss through small leaves, and sometimes protect themselves with thorns. She wanted to note how these plants survived in such harsh conditions.

19. Small or needle-like leaves in desert plants help in:

- A) Reducing water loss
- B) Trapping insects
- C) Absorbing more sunlight
- D) Producing flowers

20. Thorns on desert plants mainly help in:

- A) Storing water
- B) Protecting the plant from animals
- C) Making food
- D) Absorbing nutrients

21. Which part of the desert plant helps in absorbing water from soil?

- A) Leaves
- B) Stem
- C) Roots
- D) Thorns

COMPREHENSION-2

Village A uses solar power, practices "Reduce, Reuse, Recycle," and has a large forest nearby.

Village B has many factories, throws plastic waste into the fields, and recently cut down their forest to build a shopping mall.

22. Which village is likely to see a decrease in the variety of plants and animals (Biodiversity)?

- A) Village A, because solar panels scare away birds.
- B) Village B, because deforestation destroys natural habitats.
- C) Both villages will have the same biodiversity.
- D) Village B, because factories attract more animals.

23. A scientist tests the soil in Village B and finds it is "unhealthy for farming." What is the most likely cause based on the text?

- A) Soil Conservation
- B) Soil Pollution caused by plastic and chemicals.
- C) Too much oxygen from the shopping mall.
- D) High humidity from the factories.

24. Why is the air in Village A likely to be cleaner and the temperature more stable than in Village B?

- A) Because the forest in Village A absorbs carbon dioxide.
- B) Because Village A is closer to the Sun.
- C) Because Village B has more people to keep the air warm.
- D) Recycling plastic makes the wind blow faster.

COMPREHENSION-3

Festivals, Earth's movements, Moon phases, eclipses, satellites, and planets together reveal

how celestial phenomena shape time, seasons, and human life.

25. Which situation best explains why satellites do not fall back to Earth?

- A) They are outside Earth's gravity
- B) They move fast enough to continuously fall around Earth
- C) They are pushed by sunlight
- D) They are lighter than air

26. Which pair correctly matches visibility with celestial alignment?

- A) New Moon – Earth between Sun and Moon
- B) Full Moon – Moon between Earth and Sun
- C) Lunar Eclipse – Earth between Sun and Moon
- D) Solar Eclipse – Sun between Earth and Moon

27. If Earth's tilt were removed but revolution continued, which festival relation would be least affected?

- A) Makar Sankranti (Sun's movement)
- B) Holi (Full Moon)
- C) Christmas (seasonal solar change)
- D) Harvest festivals (season-based timing)

Section - 4

28. Match Column I with Column II

Column I (Process)	Column II (Description)
A. Collection	1. Interlacing yarn to form fabric
B. Spinning	2. Twisting fibres into yarn
C. Weaving	3. Gathering raw material like cotton

D. Stitching	4. Making garments from fabric
--------------	--------------------------------

A) A-1, B-2, C-3, D-4

B) A-2, B-3, C-4, D-1

C) A-3, B-2, C-1, D-4

D) A-3, B-1, C-2, D-4

29. Match Column A with Column B

Column A (Mixture Type)	Column B (Best Method)
P. Distillation	i. Difference in boiling points
Q. Winnowing	ii. Difference in particle size (Big vs. Small)
R. Separating Funnel	iii. Difference in weight (Heavy vs. Light)
S. Sieving	iv. Liquids do not mix (Immiscible)

Which of the following options shows the correct matching?

A) (p)-(ii), (q)-(iii), (r)-(iv), (s)-(i)

B) (p)-(iii), (q)-(ii), (r)-(i), (s)-(iv)

C) (p)-(ii), (q)-(iv), (r)-(i), (s)-(iii)

D) (p)-(i), (q)-(iii), (r)-(iv), (s)-(ii)

30. Match Column I with Column II

Column A	Column B
a) Lion	P) Eats grass and leaves
b) Cow	Q) Eats other animals
c) Rabbit	R) Eats small insects and animals
d) Eagle	S) Eats vegetables and plants

A) a-Q, b-P, c-S, d-R

B) a-P, b-Q, c-R, d-S

C) a-R, b-P, c-Q, d-S

D) a-Q, b-S, c-P, d-R
