

Syllabus

Plants Around Us, Animals Around Us, Food We Eat, Clothes, Safety and First-Aid, Human Body, Matter Around Us, Force, Work and Energy, Air and Water, Earth and Universe, Our Environment.

Instructions:

1. This question paper contains 35 questions. All questions are compulsory.
2. The duration of the examination is 60 minutes.
3. Each question carries 2 marks. There is no negative marks for wrong answers.
4. Use only blue or black ball-point pen to mark your answers on the OMR Answer Sheet.
5. The use of calculators, mobile phones, smart watches, log tables, or any electronic gadgets is strictly prohibited.

Science

1. A farmer is trying to improve his crop yield. He chooses a specific type of soil that is a balanced mix of sand and clay, known for holding both water and nutrients effectively. Which soil is he using?
(A) Gravelly soil
(B) Loamy soil
(C) Clay soil
(D) Rocky soil
2. Sarah placed a healthy potted plant inside a dark cupboard and watered it regularly. After one week, she noticed the leaves had turned yellow and the plant looked very weak. What was missing that prevented the plant from making its own food?
(A) Water from the soil
(B) Fresh air from the window
(C) Sunlight to help the leaves make food
(D) Space to grow taller

3. You observe the night sky in July and again in January. Why are the constellations you see likely to be different?

- (A) The stars travel to the other side of the universe every six months.
- (B) Constellations change their shapes every few months.
- (C) Different constellations are visible during different seasons as Earth orbits the Sun.
- (D) The stars turn off their light during the summer months.
4. Rohith's mother tells him to drink milk every day because it makes his bones and teeth strong. Which specific mineral found in milk is responsible for this?
- (A) Iron which makes blood red
- (B) Iodine which helps us grow
- (C) Calcium which builds strong bones
- (D) Sugar which gives us energy
5. Inside our chest, we have a very important organ that acts like a pump. It beats all day and night to send blood to every part of our body. What is this organ called?
- (A) The Lungs (B) The Brain (C) The Heart (D) The Stomach

6. In a chemistry lab, a student mixes salt, iron filings, and sand. He wants to recover the iron filings first. Which property should he exploit to separate them quickly?
 - (A) Solubility in water
 - (B) Particle size using a sieve
 - (C) Magnetic attraction
 - (D) Boiling point through evaporation
7. If Earth's speed of rotation were to double, how many hours would it take for the Earth to complete one full turn on its axis?
 - (A) 24 hours
 - (B) 365 hours
 - (C) 48 hours
 - (D) 12 hours
8. During which seasons do both the Northern and Southern Hemispheres receive nearly equal amounts of sunlight?
 - (A) Spring and Autumn
 - (B) Summer and Winter
 - (C) Only during the Summer
 - (D) Only during the Winter
9. Which of the following is an example of a chemical change?
 - (A) Tearing a piece of paper into tiny bits
 - (B) Dissolving sugar into a hot cup of tea
 - (C) An iron nail rusting after being left in the rain
 - (D) Melting a chocolate bar in the sun

10. Match the environmental issues in Column I with their primary causes in Column II:

Column I (Issue)	Column II (Cause)
(a) Smog	(1) Overgrazing and deforestation
(b) Soil Erosion	(2) Smoke mixing with fog
(c) Global Warming	(3) Harmful chemicals in rivers
(d) Water Pollution	(4) Burning fossil fuels

- (A) (a) → 2, (b) → 1, (c) → 4, (d) → 3
 - (B) (a) → 1, (b) → 2, (c) → 3, (d) → 4
 - (C) (a) → 4, (b) → 3, (c) → 2, (d) → 1
 - (D) (a) → 2, (b) → 4, (c) → 1, (d) → 3
11. Read the passage below and answer the following question:
 Humidity is the amount of water vapor in the air. During the monsoon, humidity is very high, which prevents sweat from evaporating quickly, making us feel sticky. In contrast, deserts have low humidity, making the air feel very dry.
 why do we feel more uncomfortable on a hot, humid day than on a hot, dry day?
 - (A) High humidity makes the air move faster as wind.
 - (B) High humidity prevents our sweat from evaporating to cool us down.
 - (C) Low humidity in deserts makes the air heavier.
 - (D) Dry air holds more heat than moist air.

- 12.** Which of the following is a simple way you can practice the "Reuse" part of the 3 R's (Reduce, Reuse, Recycle) at home?
- (A) Turning off the tap while brushing your teeth.
 - (B) Using an old jam jar as a pencil holder.
 - (C) Throwing all your old notebooks in the trash can.
 - (D) Buying a new plastic toy every week.
- 13.** Imagine you are looking at a flowchart of animals classified by their breathing organs. If "Animal X" breathes through spiracles and "Animal Y" breathes through its moist skin, which pair of animals could they be?
- (A) Animal X: Fish; Animal Y: Frog
 - (B) Animal X: Grasshopper; Animal Y: Earthworm
 - (C) Animal X: Whale; Animal Y: Snake
 - (D) Animal X: Pigeon; Animal Y: Cockroach
- 14.** Imagine you are playing on a seesaw in the park. You notice that the board moves up and down on a fixed middle point. What is this fixed point called?

- (A) Fulcrum (B) Slope (C) Wedge (D) Axle
- 15.** Sita often feels tired and weak during the day even after eating enough food. Which nutrient should she include more in her diet to get energy for daily activities?
- (A) Proteins (B) Vitamins (C) Carbohydrates (D) Minerals
- 16.** In the human body, which of the following processes describes the movement of oxygen from the lungs into the blood and the movement of carbon dioxide from the blood into the lungs?
- (A) Digestion (B) Circulation
 - (C) Gaseous Exchange (D) Excretion

17. If all the planets were put into a huge ocean of water, which planet would float because it is very light and less dense?
 (A) Saturn (B) Uranus (C) Neptune (D) Jupiter
18. If you were looking for the largest volcano and the deepest canyon in the entire Solar System, which planet would you need to visit?
 (A) Jupiter (B) Mars (C) Venus (D) Earth
19. Which of the following components of air is correctly matched with its percentage and primary function?
 (A) Oxygen - 78% - Needed for burning
 (B) Nitrogen - 21% - Used by plants to grow
 (C) Carbon Dioxide - 0.03% - Used in photosynthesis
 (D) Water Vapor - 0% - Protects from UV rays
20. During a laboratory experiment, a student observed a solid substance changing directly into a gas when heated, without ever becoming a liquid. Which process and example best describe this?
 (A) Vaporization; Boiling water (B) Sublimation; Dry ice
 (C) Deposition; Frost on a window (D) Condensation; Fog on a mirror
21. A village is experiencing a shortage of clean drinking water. They decide to use a method where water is heated until it turns to steam, and then the steam is cooled back into pure liquid water to leave all impurities behind. What is this method called?
 (A) Chlorination (B) Filtration (C) Distillation (D) Sedimentation
22. A person is standing still while holding a heavy grocery bag. Which statement correctly identifies the 'work' being done?

- (A) No work is being done because the bag is not moving.
 (B) Work is done only if the person stands for a long time.
 (C) Work is being done because the bag is very heavy.
 (D) Work is being done because the person is getting tired.

- 23.** Look at the picture of the human skeleton. Why is the "Skull" (the bone in our head) so hard and strong?

- (A) To help us comb our hair easily.
 - (B) To protect the soft and very important brain inside.
 - (C) To make our head heavy so we don't fall.
 - (D) To help us see better.
- 24. Assertion (A):** Our heart beats much faster when we are running a race.
Reason (R): The body needs more oxygen and energy delivered to the muscles while we run.
- (A) Both Assertion (A) and Reason (R) are true, and R is the correct explanation of A.
 - (B) Both Assertion (A) and Reason (R) are true, but R is NOT the correct explanation of A.
 - (C) Assertion (A) is true, but Reason (R) is false.
 - (D) Assertion (A) is false, but Reason (R) is true.
- 25.** A scientist is studying a substance that has no fixed shape but does have a fixed volume. If she pours this substance from a round flask into a square tray, which of the following will happen?
- (A) Its volume will increase to fill the tray.
 - (B) It will keep the shape of the round flask.
 - (C) It will take the shape of the square tray.
 - (D) It will turn into a solid to maintain its shape.

26. Assertion (A): We should not use plastic bags for carrying groceries.

Reason (R): Plastic is a non-biodegradable material that stays in the soil for hundreds of years.

(A) Both Assertion (A) and Reason (R) are true, and R is the correct explanation of A.

(B) Both Assertion (A) and Reason (R) are true, but R is NOT the correct explanation of A.

(C) Assertion (A) is true, but Reason (R) is false.

(D) Assertion (A) is false, but Reason (R) is true.

27. A food item gives energy slowly and keeps us active for a long time. Which one fits best?

(A) Sugar (B) Chocolate (C) Wheat chapati (D) Candy

28. When a rubber band is stretched but not released yet, what type of energy does it have?

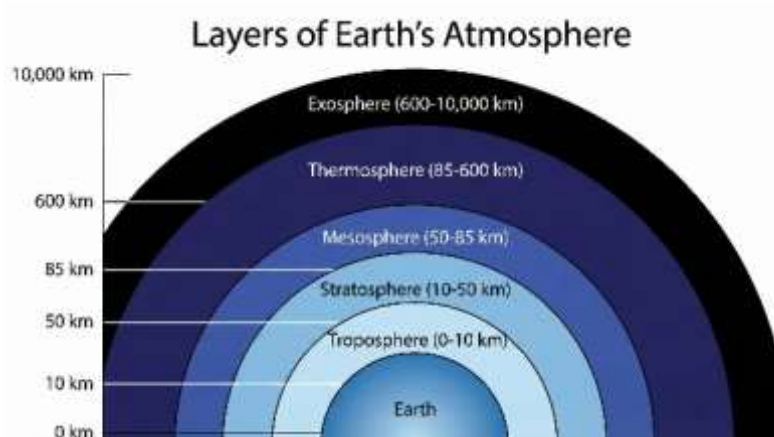

(A) Electrical Energy

(B) Potential Energy

(C) Sound Energy

(D) Kinetic Energy

29. Observe the provided diagram of the Earth's atmosphere. If a meteor enters the atmosphere and begins to burn up, in which layer does this most likely occur?

(A) Troposphere

(B) Stratosphere

(C) Mesosphere

(D) Exosphere

- 30.** Identify the group that contains ONLY non-renewable energy sources:
- (A) Coal, Petrol, Natural gas (B) Wind, Coal, Sunlight
- (C) Water, Petrol, Wind (D) Sunlight, Wind, Water
- 31.** **Assertion:** The ozone layer is vital for the survival of living organisms on Earth.
Reason: It is located in the stratosphere and absorbs harmful ultraviolet (UV) radiation from the Sun.
- (A) Both Assertion and Reason are true, and Reason is the correct explanation of Assertion.
- (B) Both Assertion and Reason are true, but Reason is not the correct explanation of Assertion.
- (C) Assertion is true, but Reason is false.
- (D) Assertion is false, but Reason is true
- 32.** A cook accidentally drops a spoonful of salt into a container of uncooked rice. Since the rice grains are much larger than the salt crystals, which tool should she use to separate them?
- (A) A magnet (B) A fine-mesh sieve
- (C) A filter paper (D) A separating funnel
- 33.** Imagine you are helping your parents in the kitchen. You notice that some foods like milk are kept in the refrigerator, while dried grains like rice are kept in tight jars. Why do we do this?
- (A) To make the food look more organized.
- (B) To prevent germs and mold from growing and spoiling the food.
- (C) To make sure the food stays warm and tasty.
- (D) To help the food grow bigger while it sits on the shelf.
- 34.** If it is currently winter in the Northern Hemisphere, what can you conclude about its orientation toward the Sun?
- (A) It is not tilted at all. (B) It is tilted away from the Sun.
- (C) It is at its closest point to the Sun. (D) It is tilted toward the Sun.
- 35.** If you see a group of animals where the mother gives birth to babies and feeds them her own milk, which animal could NOT be part of this group?
- (A) A Cow (B) An Elephant (C) A Hen (D) A Cat

KEY

1) B	2) C	3) C	4) C	5) C	6) C	7) D
8) A	9) C	10) A	11) B	12) B	13) B	14) A
15) C	16) C	17) A	18) B	19) C	20) B	21) C
22) A	23) B	24) A	25) C	26) A	27) C	28) B
29) C	30) A	31) A	32) B	33) B	34) B	35) C
